

Pokemon Thaumatrope

A **thaumatrope** is a toy that was popular in the 19th century. A disk with a picture on each side is attached to two pieces of string. When the strings are twirled quickly between the fingers the two pictures appear to blend into one due to the persistence of vision.

Catch your Pokémon by coloring and pasting the circles together then punch two holes across the diameter of the circle and attach strings from each side. Spin the strings to see the optical illusion.
